

# HUEY AND LOUIE MEET DEWEY

**DIRECTIONS:** Help the twins Huey and Louie organise the following books by using your guide to the Dewey decimal system.

Begin by recording the three-digit number for the group of books that best fits each title. For example, a book called *Maths for Beginners: Addition and Subtraction* would belong to the category 510 Mathematics. Then put the titles in order from 1-10. The book with the lowest category number should be ranked number 1.

| <b>RANK<br/>(1-10)</b> | <b>CATEGORY<br/>(010-990)</b> | <b>TITLE</b>                   |
|------------------------|-------------------------------|--------------------------------|
| -----                  | -----                         | <i>Photography Handbook</i>    |
| -----                  | -----                         | <i>It's All Greek To Me</i>    |
| -----                  | -----                         | <i>Football Skills</i>         |
| -----                  | -----                         | <i>Seashore Animals</i>        |
| -----                  | -----                         | <i>Biology For Beginners</i>   |
| -----                  | -----                         | <i>Farming For Fun</i>         |
| -----                  | -----                         | <i>Jazz and Soul</i>           |
| -----                  | -----                         | <i>Poetry Companion</i>        |
| -----                  | -----                         | <i>The Highland Clearances</i> |
